Why Choose RitAPI Guard

Feature/Aspect	Using RitAPI Guard	What happens if you don't use RitAPI Guard Interface?
Protection Model	**Self - Protection**	**Depends on external protection**
Intelligence (AI)	**Built-in AI, No Need for External Integration**	**Requires complex & costly AI integration**
Connectivity	**Fully Functional Even Offline**	**Not operational if connection is lost**
Security Principle	**Secure by Design (Safe from the Start)**	**Security is added only in the final stage**

System Architecture

| Client | RitAPI Guard | Application/API | Secured Backed |
