“Protect your IP - Defend your Identity”

# About RitAPI Plug-in

RitAPI Plug-in is a new product from PT Sydeco that serves as a modular cybersecurity tool that seamlessly integrates into your applications, offering AI-based protection for your APIs and IP endpoints. Suitable for developers, SaaS providers and self-hosted solutions.

# Key Features

RitAPI Plug-in “Protect your IP - Defend your Identity”

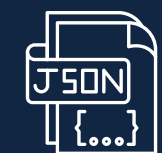

- Light and modular installation

- Real-time IP/API inspection

- TLS behavior monitoring

- JSON schema validation

- ASN & origin trust analysis

# How to Work

RitAPI Plug-ins act as a filter layer before your application's API endpoints.

Analyzing incoming demand using AI models

Comparing metadata, certificate behavior, ASN origin, and request structure.

# Easy Integration

Supports programming  
languages

Python, Node.js, Go, and Java

Assisting you  
in

Configure the API profile

Activating  
Inspection

In real-time

# Use Cases

RitApi Plug-in “Protect your IP - Defend your Identity “

- Prevent incognito attacks on login APIs
- Block corrupted JSON payload
- Threat detection from unauthorized cloud
- Apply access policy based on ASN group

# Why Choose RitAPI Plug-in

Features/Aspects

Using RitAPI Plug-in

What happens if you don't use RitAPI Advanced Interface?

**Installation**

**Plug & Play (Very Easy)**

**Requires complex installation, technicians, and time.**

**Hardware**

**No Additional Hardware Required**

**Often requires investment and maintenance of expensive hardware.**

**Readiness & Compliance**

**Ready to Use & Regulatory**

**Requires customization or adjustment for compliance, time-consuming.**

**Advanced Technology**

**Powered by AI ARCHANGEL 2.0**

**Basic technology, less adaptive or predictive.**

**Quick Activation**

**QR-Code activation via ritapi.io**

**Manual, complicated, or time-consuming activation process.**
