

RitAPI

Case Study

Government Sector

Protect Your IP - Defend Your Identity

Executive Summary

In the government sector, cybersecurity threats have evolved rapidly. This case study showcases how RitAPI successfully protected critical operations and data.

Problem

- Sensitive citizen data leaks due to unprotected APIs
- Advanced persistent threats targeting government systems
- Compliance issues with national cybersecurity laws

Solution

- Deployed zero-trust API access controls
- Integrated ASN/IP trust scoring to block risky sources
- Continuous monitoring with AI anomaly detection

Results

Blocked 98% of targeted attacks within first 2 weeks

Improved citizen data security compliance score by 35%

Enhanced incident response time by 60%

RitAPI

About RitAPI

RitAPI is an AI-powered cybersecurity solution designed to protect IP and API endpoints from malicious requests, impersonation, and supply chain attacks. With real-time defense and deep inspection, RitAPI ensures operational continuity and compliance.
